About Tootbus

We offer customers a sustainable and immersive discovery of the city adapted to new travellers' expectations including authentic, entertaining and surprising experiences. We are more than a bus tour. Our role is to help our customers create memories and emotional connections with the city and to "Let the city simply take them by surprise"

PLANET FRIENDLY : We love the city; we protect the city. We operate the greenest fleet of hoho buses, composed of clean-energy buses, fully electric, biogas or biofuel. We push to reduce plastic and paper waste partly through digitalisation.

LOCAL: We have restructured our offer to better match visitors demand among a more locally based and family-oriented clientele.

We want our customers to feel confident and experience the city like a local. Thus, we have designed new digital platforms including an optimised user experience tailored to our audience. Some of the new functionalities implemented to enhance the experience are a view of our routes, our stop locations, follow our buses in real time and learn key facts by playing the audio guide as they go.

FAMILY FRIENDLY: We have designed family-oriented special tours and commentaries and adapted rates to match family's demand.

From transportation to entertainment

We make it responsible

- We work for years if not decades with local stakeholders and authorities and we care about local residents.
- We live in our city, we love our city, we protect our city.
- Your ride is eco-friendly: take a seat in one of our clean air busses.

We make it easy

- Easy to remind and recognize (name, bus liveries, visual & sound identity),
- Easy to buy, easy to find, easy to travel with, easy to contact...
- We are here to show you the best parts of the city, guaranteeing an easy journey rich with discoveries.

We make it memorable

There are many ways of discovering a city, but what you can always expect is a travel experience that will leave you with lots of happy memories to share.

Tootbus is bringing emotion to the customer experience **by designing emotional sensory experiences.**
